

Charcoal Class

January welcomed not only a new year in but also a new term for Charcoal class with an addition to the time table of Rock Steady with the aim that they will have a song ready for performance by the end of term. Rock Steady gives them the opportunity to play different instruments (drums, keyboard, various guitars). As part of Discovery, students made volcanoes and then with a touch of magic (science) were able to make them erupt. The early evenings are perfect for our Science topic of our Solar System and being able to look at the moon, stars and planets especially with the planetary alignment of Mars, Venus, Jupiter and Saturn this month.
