

## Green

This month pupils have been busy learning about Judaism and they looked at how and why Hanukkah is celebrated. In Music they are exploring beat and rhythm using keyboards. In Cooking they have been learning chopping techniques and they were able to make chips! They enjoyed a creativity day reflecting on their outing to the ancient farm and they made shields, roundhouses and pottery. In Science they have learned about habitats and how everything depends on each other in their environment. The last week of school everyone was getting in the Christmas spirit and enjoyed the many Christmas activities.
