

## Lemon Class

In May, we have continued our learning about 'Growing', through the Singing Hands song 'I Dig My Garden' and the story 'Jasper's Beanstalk'. We have planted cress seeds and watched them grow, and explored digging in our garden.

In Maths, we have used a range of resources to practise our counting skills and to order numbers, and number songs and rhymes to help us to learn about adding 'one more'.

In Phonics, we have been practising saying and recognising different phonemes (sounds) and graphemes (written letters), and beginning to blend the sounds together to make words.

In our Understanding the World lessons, we have been exploring natural resources outside, including water, fir cones and different plants.
